QUICK SHEET · CONSTITUTION OF THE FEDERATED REPUBLIC

The Monitors

Three watchdogs, each constituted by a body other than the one it watches. Information-only — they publish, they don't decide — until a Monitor's own conflict of interest turns the design in on itself, and the closeness of the three Monitors' own working relationship becomes the problem.

§9.1 – §9.9, §9.9.a
Article IX

THREE MONITORS, ONE RULE — §9.1, §9.1.A-C

Legislative Monitor

WATCHES
The Legislature — census, redistricting, mandate compliance, referendum eligibility

SELECTED BY
SC nominates → national popular vote

Own candidate pool audited by: EM + JM jointly

Executive Monitor

WATCHES
Both Consuls + the Monetary Authority — military compliance, appointments, electoral finance

SELECTED BY
Assembly + Senate Speakers jointly → national popular vote

Own candidate pool audited by: LM + JM jointly

Judicial Monitor

WATCHES
Courts, Elections Panel, Article XVI/XX compacts — audits constitutional pool administration

SELECTED BY
Public lottery, former-judges pool → national popular vote

Own candidate pool audited by: LM (service record) + EM (financial disclosure)

IF A MONITOR IS COMPROMISED, INCAPACITATED, VACANT, OR UNDERFUNDED — §9.1.D, §9.1.E, §9.6, §9.7.A

TERM EXPIRY

Automatic Void

Authority ends the instant a term expires — no further act needed. Any act taken after is constitutionally void.

/

MID-TERM VACANCY

Acting by Seniority

Most senior eligible pool member who accepts acts until a successor assumes authority under §9.3; continuous tenure controls, then age (§9.1.d).

/

BAD FAITH — §9.7.a

2-of-3 Determination

Two Monitors jointly determine bad faith and publish their evidence; suspension is immediate. It ends after 30 days unless an extension vote is requested in time; timely filing continues suspension pending certification within 90 days. Extension needs 60% / 55% participation, never beyond six months. The §9.1.d acting mechanism applies (§9.7.a, §9.1.e).

→

FUNDING FLOOR — §9.6

Self-Executing

Budget below the MA-certified inflation floor without 2/3 override? The MA-certified floor (prior year, adjusted for price change) takes effect automatically — no Monitor has to ask.

REMOVAL — AND WHERE A MONITOR'S OWN ETHICS FITS

Standard Track §9.9

`1/3 either chamber, or 2-of-3 Monitors` → `Grounds published to NRS` → `2/3 both chambers`

This legislative-vote track applies to other independent officers within §9.9's scope, on statutory removal grounds. Monitor Generals instead face a national referendum initiated by the branches they do not audit. Filing does not suspend authority; the vote is held within 90 days or at the next federal election, and 60% approval with 55% participation removes. A failed or untimely vote closes the proceeding.

Monitor Self-Disclosure §9.9.a

`Publish direct to NRS` → `No peer review` → `§9.9 if concealed`

Monitors disclose like any officer, but **no Monitor reviews another's disclosure** — the JMC's close, years-long working relationship makes peer review the wrong tool here. Concealment or an unrecused conflict must be a statutory §9.9 removal category. No new institution invented — but for a Monitor General, §9.9 removal now runs its own route: initiated by the branch that Monitor does not audit, and decided by national referendum rather than by the Legislature.

NUMBERS WORTH REMEMBERING

10 years — full **non-renewable** term. An unscheduled replacement serves only the remainder; acting service is separate.

2/3 of both chambers to **cut Monitor funding** below its inflation-adjusted floor — otherwise the cut simply doesn't take effect.

2 of 3 Monitors is **JMC quorum** — no joint function can be permanently blocked by one Monitor's non-participation.

0 findings are **binding** on anyone. Monitors publish; they never enforce, direct, or decide.

A theoretical constitutional design project — not the law of any existing nation.
